ABOUT ME

I works as a programmer since 2017, I specialize in as frontend developer who makes new projects and advances existing ones. I am independent but also I good feel in team work where together we can develop our competencies.

I am person who not only creates code, but also engages in the full scope of the design process. I will be happy to share my experience and knowledge to create unique solutions together.

EXPERIENCE

1. **Web Developer, Intermania Wadowice - from 2017 to 10 may 2022**

In Intermania i made many projects in Wordpress, every website was maked on template which i design in figma and wrote from zero. I participated in every website process from talking with clients to final product.

2. **Frontend Developer, Home.pl S.A. - from 10 may 2022 to now**

At Home.pl I work as frontend developer in team who work on one large e-commerce project, we make new solutions, develop our project in terms of performance and fix bugs. I cooperate with UX and UI designers and business teams to make best product for our clients.
